Cold Planer Series II

For skid-steer loaders, utility loaders and wheel loaders

APPLICATIONS:

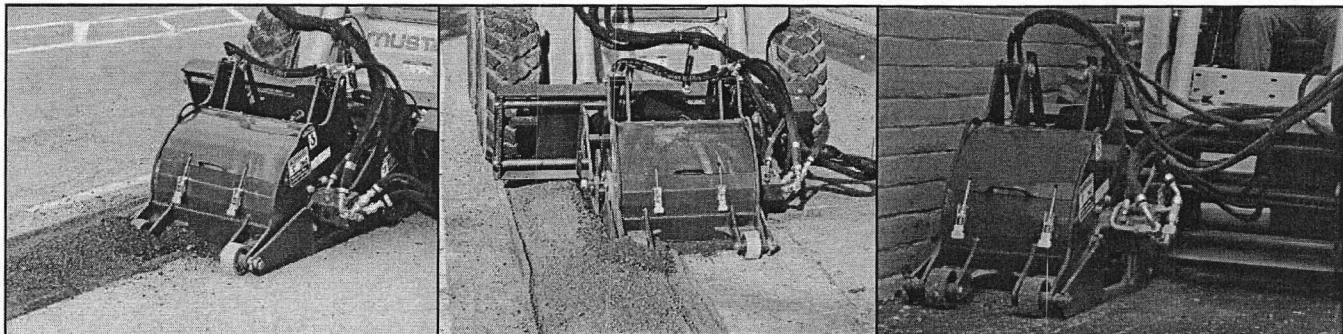

- Mills frost heaves around manholes, handles full-depth utility cuts
- Restores proper drainage to pavement and textures pavement for skid resistance, removes traffic lane stripes
- Scarifies concrete and planes sidewalks and street joints
- 2 sizes available for standard flow skid steers; 6 sizes available for high-flow skid steers

FEATURES:

- Side shifts 24" left or right to cut next to curbs and obstacles
- Solid drum pushes milled material to the back, preventing remilling
- Large access door allows easier bit maintenance
- V style pic pattern for efficient milling

ALITEC™ SKID STEER ATTACHMENTS

COLD PLANERS (Continued)

Cold Planers for High-Flow Skid Steers

FEATURES:

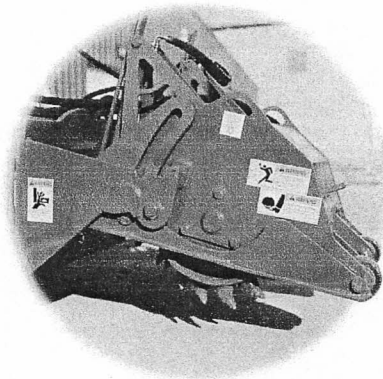

- Skid Steer (SAE J2513) Quick Attach System
- Hydraulic depth up to 6 inches
- 22-inch Hydraulic side-shift
- Top center pivot design
- Front and rear cast wheels
- Dual depth cylinders
- Double reduction planetary drive
- Debris guards
- Hydraulic hoses included
- Top accessible drum
- Pick removal tool
- Welded to American Welding Society standards

OPTIONAL FEATURES:

- Electro-hydraulic controls for tilt, depth and side-shift
- Electric wiring harness to match host machine

APPLICATIONS:

- For asphalt and concrete applications
- Curb cuts (wedge cuts)
- Butt joints
- Pothole repair
- Milling of frost heaves in pavement
- Re-establish proper drainage characteristics of pavement
- Texture pavement for skid resistance
- Remove asphalt around manholes and storm drains prior to overlay
- Traffic stripe removal (fine finish)
- Mill small areas inaccessible by larger dedicated planers
- Full depth utility cuts prior to installation or repair of gas, sewer and water lines
- Bridge deck planing due to weight restrictions of larger planers

Trustees,

After the May 6, 2015 Trustee Meeting, I requested complete copies of both the Concord quote as well as the Judco quote from Gene Layne. Along with the Trustees, prior to the meeting I had received only pages 2 & 3 of the Concord Equipment Mfg., Inc. quote (the entire quote consists of 10 pages) and had never seen any of the Judco, Inc. quote. Upon obtaining all information on May 11, 2015 from Gene Layne and reviewing it I am finding issue with how this bid and contract letting has been conducted. I have attached complete copies of both Concord & Judco quotes for your reference and review. I have also prepared a list of procedural changes that I strongly recommend to avoid potential issues with the Auditor of State:

- 1.) All quotes should be sent by the bidder to both the Department Head (if desired) and the Fiscal Office to avoid any potential for improper bid manipulation, modification, or steering.
- 2.) All quotes should be provided to the Trustees as well as the Assistant to the Trustees for complete review prior to any meeting to decide on award.
- 3.) All quotes must be provided in their entirety, without edit, modification, or deletion.
- 4.) Award to Department Head recommendation should only occur after full review by the FO, Assistant to the Trustees, and Trustees and verification of facts pertaining to the reason for selection, especially if the lowest bid is not chosen.

I objected to the loose nature of the Concord delivery terms contained in their quote at the Trustee meeting and recommended that we ask for a written penalty clause to be included, to no avail. More importantly, I am disappointed to find after reviewing the Judco quote that ALL of our specifications were met without exception at a lower cost to Russell Township and, different than Concord, Judco provided a Predelivery inspection at OUR facility prior to paint and through the warranty period provides pick up & return of the vehicle for repairs to our facility. This not only negates the argument that Elyria (47 miles) is further to take the truck than Painesville (22 miles) but it also reduces our future potential for towing costs should the vehicle be in need of repairs, preventing it from being driven.

Although the decision to use Concord may in fact be the best choice for the Township, the method used to obtain this decision is severely flawed and potentially violates ORC regarding a contract of this size. Again, I strongly recommend that the Trustees alter their process and clearly communicate it to the Department Heads to avoid this situation in the future.
